

Newsletter: Spring Term - Issue 1

Date: 24.02.2017

This term the children have been taking part in:

Litter Picking

Bird Watching

The children have been busy keeping our environment tidy. They used the litter pickers to pick up the rubbish.

We carried out bird watching surveys in the nursery garden and noticed many birds flying up above.

Planting

The children have been planting their own magic beans. They talked about what the beans need to help them grow.

We have planted daffodil bulbs in the nursery garden. They are growing fast!

This Term and Next Term

Children will be learning about taking care of the environment and monitoring water and electricity usage around the nursery.

Important Date

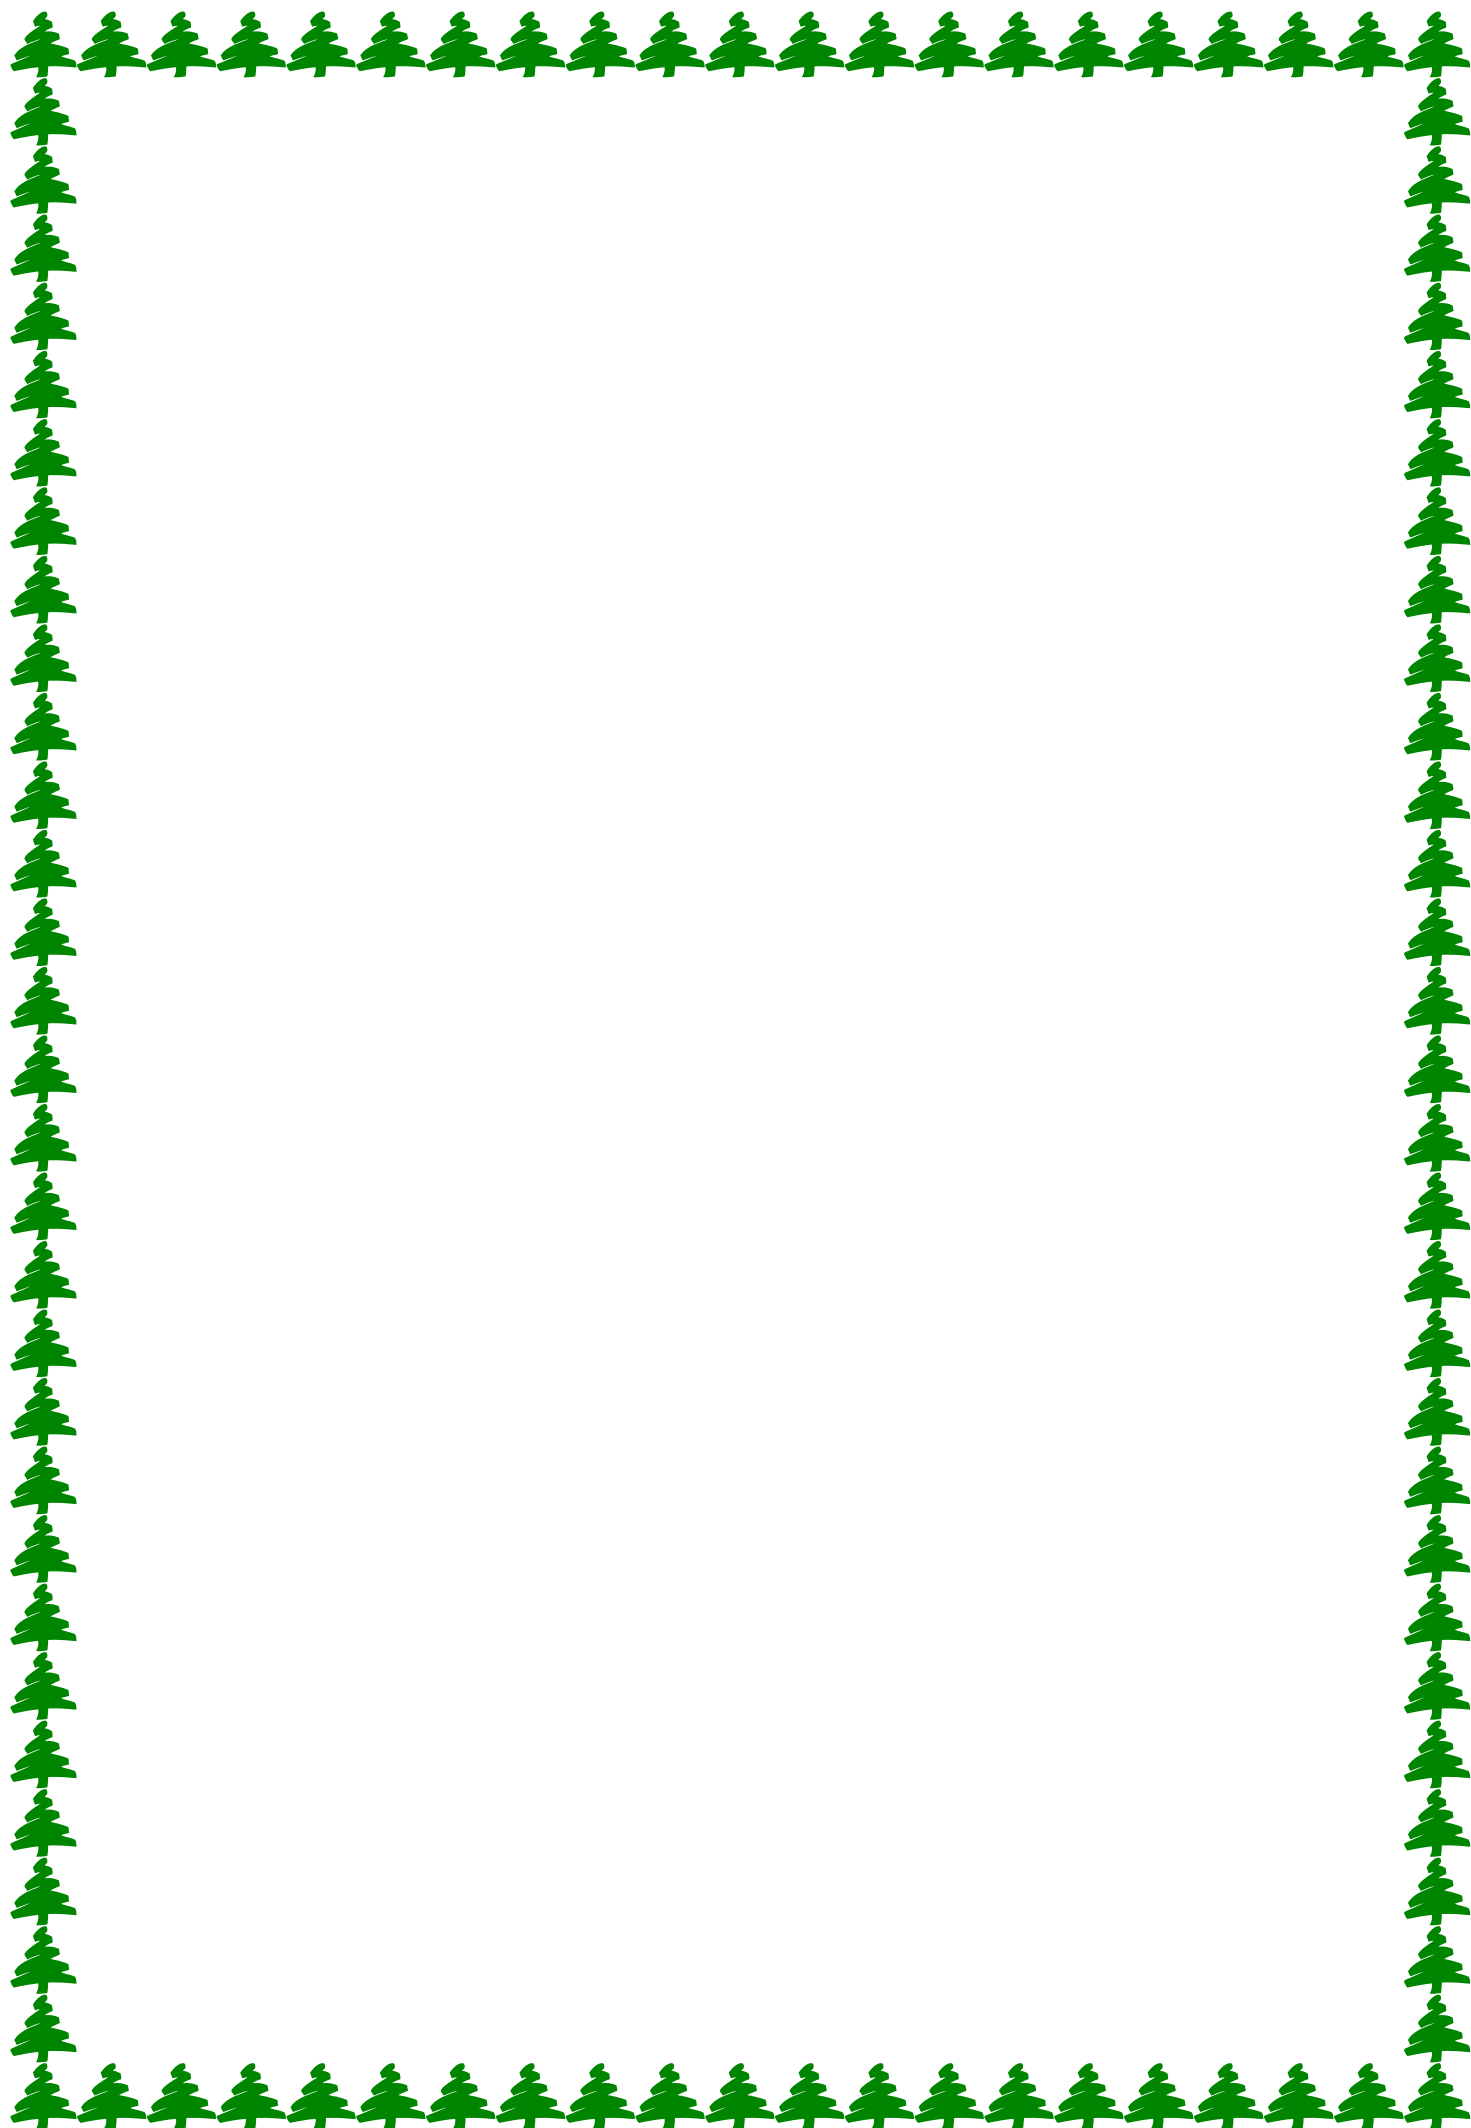

We are also looking for volunteers to come and join us on Friday 17th March 2017 for our Waltham Forest Spring Clean. If you are interested, please speak to Naline.

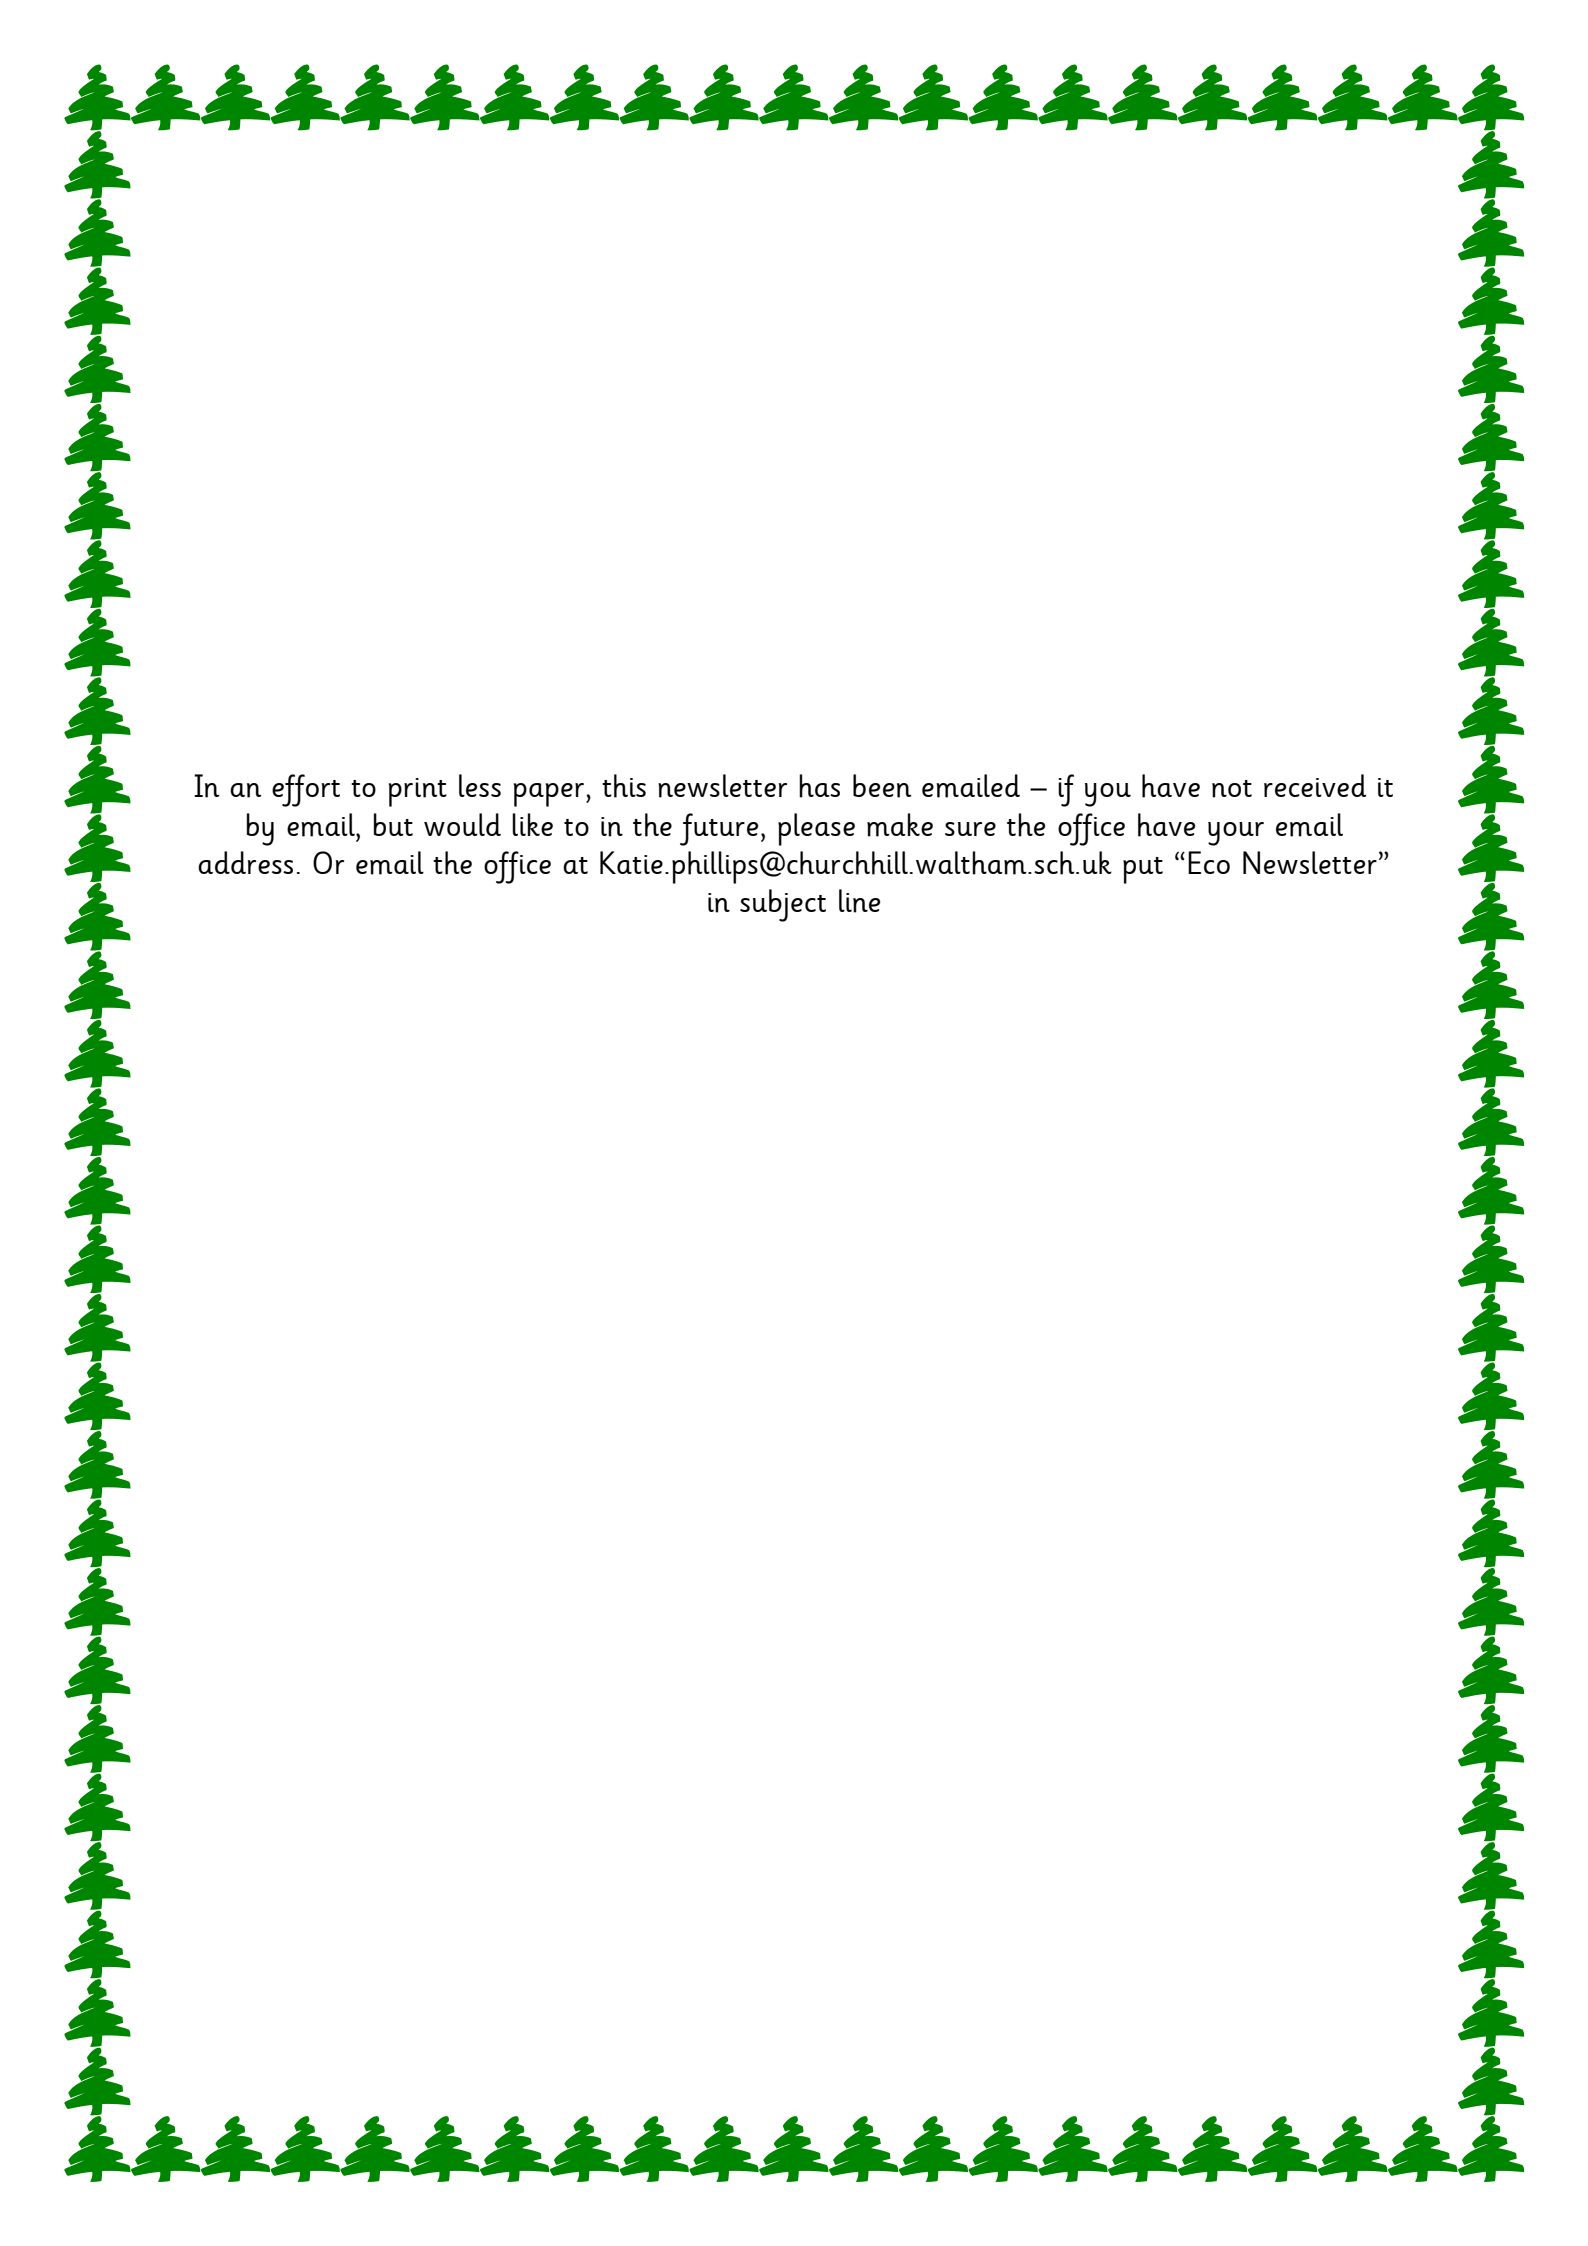

Things to do at home:

Go on local walks with your child. Talk about the environment, litter, bins, using re-useable bags and taking care of plants.

Collect various cardboard boxes, tubes and containers and sort them into your recycling bin or make a model out of them!
